

§ 923.34 Interstate boundary.

States must document that there has been consultation and coordination with adjoining coastal States regarding delineation of any adjacent inland and lateral seaward boundary.

Subpart E—Authorities and Organization

SOURCE: 61 FR 33809, June 28, 1996, unless otherwise noted.

§ 923.40 General.

(a) This subpart sets forth the requirements for management program approvability with respect to authorities and organization. The authorities and organizational structure on which a State will rely to administer its management program are the crucial underpinnings for enforcing the policies which guide the management of the uses and areas identified in its management program. There is a direct relationship between the adequacy of authorities and the adequacy of the overall program. The authorities need to be broad enough in both geographic scope and subject matter to ensure implementation of the State's enforceable policies. These enforceable policies must be sufficiently comprehensive and specific to regulate land and water uses, control development, and resolve conflicts among competing uses in order to assure wise use of the coastal zone. (Issues relating to the adequate scope of the program are dealt with in § 923.3.)

(b) The entity or entities which will exercise the program's authorities is a matter of State determination. They may be the state agency designated pursuant to section 306(d)(6) of the Act, other state agencies, regional or interstate bodies, and local governments. The major approval criterion is a determination that such entity or entities are required to exercise their authorities in conformance with the policies of the management program. Accordingly, the essential requirement is that the State demonstrate that there is a means of ensuring such compliance. This demonstration will be in the context of one or a combination of the

three control techniques specified in section 306(d)(11) of the Act. The requirements related to section 306(d)(12) of the Act are described in §§ 923.42 through 923.44 of this subchapter.

(c) In determining the adequacy of the authorities and organization of a state's programs, the Assistant Administrator will review and evaluate authorities and organizational arrangements in light of the requirements of this subpart and the finding of section 302(h) of the Act.

(d) The authorities requirements of the Act dealt with in this subpart are those contained in subsections 306(d)(2)(D)—Means of Control; 306(d)(10)—Authorities; 306(d)(10)(A)—Control Development and Resolve Conflicts; 306(d)(10)(B)—Powers of Acquisition; 306(d)(11)—Techniques of Control; and 307(f)—Air and Water Quality Control Requirements. The organization requirements of the Act dealt with in this subpart are those contained in sections 306(d)(2)(F)—Organizational Structure; 306(d)(6)—Designated State Agency; and 306(d)(7)—Organization.

§ 923.41 Identification of authorities.

(a)(1) The management program must identify the means by which the state proposes to exert control over the permissible land uses and water uses within the coastal zone which have a direct and significant impact on the coastal waters, including a listing of relevant state constitutional provisions, laws, regulations, and judicial decisions. These are the means by which the state will enforce its coastal management policies. (See section 304(6a) of the Act.)

(2) The state chosen agency or agencies (including local governments, area-wide agencies, regional agencies, or interstate agencies) must have the authority for the management of the coastal zone. Such authority includes the following powers:

(i) To administer land use and water use regulations to control development to ensure compliance with the management program, and to resolve conflicts among competing uses; and
